Milliken GARDENS
AND M. OLIVER FLOWER FARMS

IRIS and HEMEROCALLIS for 1955

Hello!

Welcome once again to Milliken Gardens! Through this catalog we hope you will find many gardening pleasures. The new varieties appearing all through these pages keep our general offering right up to date, while the introductions described below give you a chance to buy the finest of the new iris and daylilies for the first time anywhere.

On a personal note, I'd like to say that like thousands of other iris and daylily fanciers I have long been a customer and admirer of Milliken Gardens, and I want to express my pleasure and satisfaction in becoming associated with this fine concern.

M. Oliver

1955 INTRODUCTIONS

To begin with, the 1955 introductions! We have some super daylilies from two very fine breeders, W. B. Davis and Quinn Buck. We are proud of the opportunity to introduce a new iris for Sanford Babson who has made such a name for himself in so short a time.

Our real problem came when we tried to decide what to bring you from Mr. Milliken's daylily seedlings. They continue to surpass the already high standards set by those previously introduced. We have chosen three that are in large enough supply to offer at an introductory price that is a little lower than usual, but they carry the high quality that is traditional at Milliken Gardens.

THE NEW BABSON BEARDED IRIS

RED SHADOWS (Sanford Babson '55)

An exciting new RED! Ridgeway says, in a dull sort of way, that it is Bordeaux with an influence of Carmine, but it is a bright, dark red self, velvety, smooth at the haft, and perfectly formed. Conical standards and broad, semi-flaring falls. Beautifully branched stems rise from vigorous, fast increasing plants.

\$20.00

THE NEW MILLIKEN BEARDED IRIS

MISS PINK

(Milliken '55) The outstanding quality of this new iris is the intensity of its coloring. A pinker flamingo pink that is nearly a self. Only a shade of difference makes the falls lighter than the standards and the hafts are smooth with just a hint of buff. The bright tangerine beard is not out of place here, because of the brightness of the whole flower. Substance is excellent and the form semi-flaring; erect, closed standards. Both parents of this plant were eastern-bred, so there should be no question of its hardiness. A fast increaser. Introduction of this iris has been recommended by some very prominent judges of the A.I.S., and we heartily agree with their choice. It is a beautiful iris.

HEMEROCALLIS INTRODUCTIONS

ALMA KING (W. B. Davis '55) E. Early, midseason & remountant

Every time we visited Mr. Davis this past summer Alma King was the first thing that caught our eye. Named for one of Mr. Davis' lovely nieces, it is a brilliant blend of red and Indian orange that will stop you and demand to be noticed from any point in the garden. The very large flower has wide overlapping segments and a creped texture in the petals. Up to 40 buds are carried on a 36 inch, well-branched stalk that rises erect from low, compact foliage. A really fine daylily out of Bold Courtier x Merrimac.

\$20.00

ANNE DODSON (Quinn Buck '55) Midseason; reblooms

This clone is a sister seedling to the already famous Mrs. Douglas Pattison that we introduced last year. It is quite different, with a deeper color—a bright rosy bronze (poly-chrome) pastel. The petals are wide, rounded and very recurved, giving the solid effect so much sought after in this flower. The 36 in. stems carry numerous buds, held erect over 25 in. foliage, and in an established clump several flowers opening at once develop an effective flat mass of bloom. Mr. Buck dedicates this variety to his mother, Mrs. Anne Dodson Buck.

\$20.00

BRASS BAND (Milliken '55) E. Early and remountant

With the brassy blare of a military band this bold flower will call you to immediate attention. Great, wide-petaled flowers are held erect on tall, branching stems. The color, brassy yellow with a coppery wash; the growth, vigorous, with pale green, arching foliage. Joyous and abundant, this daylily will make your whole garden SING! 38 in.

\$15.00

BRONZE LUSTER (Milliken '55) E. Early midseason

The petals have a glaze that will remind you of the bronze luster finish on certain old English tea pots. The effect is as

if a dark red base color had been heavily washed with a metallic bronze lacquer. As contrast, the sepals are a dark garnet red, making this in effect a reverse bicolor. A black halo edges a small bright orange throat. Really a strange novelty for your garden and especially useful for modern flower arranging. The flower is 4 in. across with wide segments; the plant has moderate to vigorous growth with arching, 15 inch, yellow-green foliage. 28 in.

\$10.00

GOLDEN ERA (W. B. Davis '55) E. Early midseason, remountant

A wide lily-like flower of extra heavy substance and smooth finish in light cadmium-yellow with lemon-yellow sepals, given depth by a bright green throat. The segments are overlapping and open flat. An altogether lovely flower.

\$10.00

INGRID (Quinn Buck '55) Early midseason, remountant

Above vigorous, light gray-green foliage rise strong, branched scapes to about 38 inches, displaying great pale greenish yellow flowers that are enticingly ruffled, widespread and firm-textured. A near perfect daylily with many buds to insure a long period of bloom with lots of flowers open at once.

\$15.00

MARILYN WINTERS (W. B. Davis '55) E. Midseason, remountant

A second niece of Mr. Davis is honored by this deep maroon daylily. The subtle yet glowing color is sun-fast and accented by an orange throat. Multiple-branched, 34 inch stems carry up to 30 buds which open to large flowers. Another outstanding daylily from Black Falcon x Emperor Jones.

\$15.00

PIRATE SAILS (Milliken '55) E. Early midseason, remountant

Go back with us to the Bounding Main and watch the sails of the pirate ship glowing in the sunset. See how they billow in the wind, the edges reflexed and straining where they are lashed to the boom. Like the triangular topsail, this new daylily gleams in red-orange glory. Quick to increase and vigorous (it bloomed three times for us last year), it grows 52 inches tall, with stems erect as masts. Three or four proliferations per scape.

MILLIKEN HEMEROCALLIS

DAYLILIES ARE NOW MAJOR GARDEN FLOWERS

Daylily fever is spreading by leaps and bounds, and once you catch it there seems to be no stopping its spread—but nobody wants to. There is no other flower which gives as much pure enjoyment as the new daylily hybrids—they are lovely beyond words, and fit every garden need. The range is wide—the size and forms vary widely, and all are lovely.

One of the easiest perennials to grow, adaptable to almost any location, but please provide at least a half day of sunshine.

There are many which are evening bloomers, and the pale yellows and light apricots are indeed evening stars in your garden.

It is hard to say, but this child of High Noon may well be the best of the Milliken daylilies—and that is practically mutiny. The medium yellow blossoms, a bit more informal than High Noon, open late in the afternoon and carry through the next evening. MAD CAP (Nesmith)—E.

Showy and saucy is this little red orange flower atop its graceful stems. **\$1.00**

MADRIGAL (Milliken)—E. Midseason and reblooms

This lovely flower has the amazing substance of Ruffled Pinafore, the beautiful crepiness and width of petal of Colonial Dame, and the superb blending of the coloring of both parents, giving a warm apricot with a rosy dusting. Possibly the most outstanding quality of this lovely flower is the way in which the petals and sepals reflex—to an almost extreme degree, which allows one to look deep into the heart of the flower. 3 ft. **\$10.00**

MALLOW (Craig)—E. Early and remountant

One of the first hemerocallis introductions from Tom Craig, famous for his iris, is this "big fluffy rose and rose-beige bitone. . . . It often has more than 50 buds to a stem." Very early and lots of bloom. **\$7.50**

MISS ARCADIA (Buck)—Semi-E.

A multiflora type plant providing an abundance of lovely butterfly-type flowers for many weeks, making this daylily of clear bright maize yellow a most desirable addition to the garden. The flowers are medium in size, and are produced in abundance on tall spikes, often measuring 42 inches, carrying as many as 55 buds per stem. Blooms for many weeks, and is definitely a great addition to the late blooming group, as it starts to flower in July here in California. **\$10.00**

Pale yellow. Has good form and growth. 3 ft. **\$1.00**

MRS. DOUGLAS PATTISON (Buck)—E.

One of the most outstanding pastels we have ever seen, with wide petals and sepals which recurve to make a very round medium large flower. The petals are light salmon when first open, but fade to a pale buff, while the sepals which are light buff, when first open, fade to cream. The blending of colors is so perfect that the all-over effect is a luscious shade of delicate elusive pink. The throat is Empire yellow. Foliage grows to 20 inches and the spikes reach a height of about 28 inches. **\$20.00**

MY VALENTINE (Christensen)—Semi-D. Early midseason, reblooms

ONEITA (W. B. Davis)—E.

This clone bloomed over a long period of time and produced more flowers for us than any other in the garden. The excellently branched stems carried 50 or more buds that bloomed and bloomed, with as many as six flowers open at once. Added to this, new scapes were produced continuously. A very good garden color and a fine cut flower. Rosy red with paler sepals that in some weather make the flower a bicolor. 32 in. **\$2.00**

ON TOUR (Russell)—E.

Very fine, full petaled yellow flower. **80c**

A delicate bicolor with soft yellow petals and sepals. The petals are creped and the outer half is heavily washed with a warm mineral red. The petals have a Wau-Bun-like twist which adds to their beauty. A vigorous grower. 2½ to 3 ft. **\$1.25**

PERSIAN PRINCESS (Nesmith)—D. Midseason

Unusual blackish red with an overlay of purple, creating a color display not seen in any other daylily. 3 ft. **\$1.00**

PETITE (W. B. Davis)—E.

Lovely small flowers in medium shade of pink, with wide petals and sepals, the petals are heavily creped, the whole flower accented by a bright golden throat. The scapes never reach more than 24 inches, which makes this dainty variety most valuable for the garden border. **\$7.50**

PINK DREAM (Frank Childs)—D. Midseason and extended

The flowers measure about five inches across, with petals about 1-3/16 inches wide with sepals slightly less, but it is the color and the substance which gives this flower its place in the sun. PINK SATIN (Bach)—D. Midseason and late

Like soft, rose and pink satin ribbon. Vigorous and floriferous. 40 in. **\$5.00**

BEL-AIR (Milliken)

A bit on the tender side, but for a mild climate this lovely large iris of medium blue-violet with its beautifully ruffled standards and falls, and a fragrance out of this world, coupled with the added attraction of giving a wealth of winter bloom, is surely one of the most valuable. 2½ ft. **\$1.50**

BOLD CONTRAST (Linse)

A new variegata from Mr. Linse, that we can't wait to see. Let him describe it: "Standards are Inca gold, with minute rose veining, giving them a faint rosy flush. The broad semi-flaring falls are red—between raspberry and mauve rose, with narrow edging of gold. The underside is gold—but differs in that it has red veining, which seems to intensify the color of the upper side, which is absolutely smooth." Can you blame us? Wouldn't you like to see it, too? **\$15.00**

Mr. Sanford Babson's seedlings practically took the show of the Southern California Iris Society in 1954. GLOWING AMBER (Craig)—H.M., A.I.S. '54

Probably our favorite of the Craig "Fancies." Almost a variegata, which effect it gives from a distance, the glowing amber standards are washed deeper, and the falls of the same color are completely striated with a radiating pattern of red, umber, and sepia. Exciting and beautiful.

RODEO (DeForest)—H.M., A.I.S. '49

One of the most distinctive iris we list. Stately well-branched stems carry large flowers that are near perfection. High domed yellow standards top semi-flaring falls that have a white ground with yellow plicating all round the edges. Vigorous and floriferous. Reblooms. **\$1.50**

ROSE GOLD (Milliken)—Winter blooms

An exceptionally bright blend of gold and rose. It suggests the beautiful iridescent shading of Tiffany glass. The flowers are of good size, shape and substance. 3 ft. **\$1.00**

RUSSET WINGS (Wills)—A.M., A.I.S. '52

A smooth blend of gold, copper and apricot melting into a true russet self. Wide standards perfectly domed and flaring falls which ruffle at the edges make this a lovely iris. 3 ft. **\$1.00**

SAVAGE (Craig)—H.M., A.I.S. '51

The lovely flaring flowers of burnished red, with a blue blaze shooting out from the beard give a brilliant display of fireworks. 3 ft. **\$5.00**

SEA LARK (Muhlestein)—H.M., A.I.S. 47

The coloring of this iris is most uncommon. The violet-blue intensifies to a deep purple central area in both falls and standards resulting in flower of singular beauty. **\$1.00**

SKY RANGER (Hall)—A.M., A.I.S. '52

A tall, stately and heavily ruffled medium blue. 3½ ft. **\$1.00**

SNOW FLURRY (Rees)—A.M., A.I.S. '42

Pure ice white, very faintly flushed with blue. The striking feature is the frilling and ruffling. 3 ft. **\$1.00**

SOLID MAHOGANY (J. Sass)—A.M., A.I.S. '47

A very large, deep ruby-red. It is translucent and glowing. Very popular. **\$1.00**

SPELLBOUND (Linse)—H.M., A.I.S. '52

Here is an iris with all the good qualities you have been looking for. Large, horizontally flaring form, graceful ruffling, good substance and stalk, and excellent growing habits. This glowing iris is done in red with a golden overlay, and has the scent of clove pinks. 42 in. **\$6.00**

SPRING ROMANCE (Miess)

Huge creamy-white, enriched with a deep orange beard, flanked by a golden infusion on the haft. The standards are domed and ruffled with crisp horizontal falls. 3 ft. **\$3.50**

SPRING SUNSHINE (Milliken)

This light yellow iris has the largest flowers of any variety which we have grown but they are shapely and of good substance. The color is smooth and evenly distributed on both standards and falls. The stalks are especially strong and very well branched so that the flowers do not crowd. The plant is very vigorous, but must have winter protection in cold sections. 4 to 5 ft. **\$1.25**

SPRINGTIME MADONNA (Milliken)

A symphony of cream and gold. Standards very pale creamy yellow with a gold edging. The falls are beautifully ruffled and frilled and are pale yellow which turns to bright gold at the hafts giving the flower the appearance of a spot-light having been turned on the haft section. Fragrant. Illustrated on back cover. **\$1.50**

STAR SHINE (Wills)—A.M., A.I.S. '51

An iridescent sheen overlays this captivating flower that is in a soft to a more intense cream at the edges and a pearly blue flush in the falls. A very popular variety, in great demand. **\$4.00**

STEP UP (Muhlestein)

The coloring of this new amoena is especially clean. The standards are white as white can be, while the falls are clear violet blue that almost seems to be dusted over a white ground. Really a "step up" in amoena breeding. 36 in. **\$5.00**

SUNSET BLAZE (Kleinsorge)—A.M., A.I.S. '51

Huge, golden flame salmon blend, bordering on the red side. Both standards and falls are extra wide. The beard and haft markings are bright golden yellow. Blooms very early, and captured the President's Cup at the A.I.S. convention in 1949. 3 ft. **\$2.00**

TABASCO (Craig)—H.M., A.I.S. '54

Something different! A golden fancy that looks like an omelet decorated with bright red paprika for color accent. 38 in. **\$6.00**

TANGIER (Whiting)

The well-shaped standards are a rich deep yellow, the falls are the color of the deepest tone in Rocket, giving an iris of depth and richness seldom seen. The falls ripple and the color holds much better than in Rocket, one of its parents. Substance excellent. 3 ft. **\$5.00**

TECHNICOLOR (Whiting)—H.M., A.I.S. '50

Brilliant red-brown, the color carries exceedingly well, giving the effect of bright red at a short distance. Resembles Garden Glory, one of its well-known parents, in form and growing habits. 30 to 34 in. Reblooms. **\$5.00**

THOTMES III (Kleinsorge)—A.M., A.I.S. '53

As impressive and awe-inspiring as its name. Large glistening golden tan with a light bronze beard, of excellent substance. Grows tall—40 in. **\$7.50**

TINDALAO (Milliken)

One of the largest bright yellows we have had in the seedling beds. The standards are ruffled and beautifully domed. The falls are wide and ruffled. A bright golden beard and gold venations at the haft give a flower of pure gold for your garden. Reports from the Salt Lake City convention praised a large clump blooming there in spite of the cold season. Sturdy, erect stems. 48 in. **\$4.50**

TOBACCO ROAD (Kleinsorge)—A.M., A.I.S. '46

A rigid, flaring flower of moderate size in a beautiful tobacco brown color. 2½ to 3 ft. **\$1.50**

CHERIE

TOURNAMENT QUEEN (Milliken)

Year after year Tournament Queen continues to be top favorite here in many gardens. An enchanting shade of fuchsia, with falls slightly darker than the standards. The blossoms are crisp, looking almost as though they were the work of a master glass-blower. Here in California we are blessed with a full blooming season from this lovely iris every winter, as well as the regular season for iris. Perfectly hardy everywhere, and becoming increasingly popular. 3 ft. See color illustration on back cover. **\$1.50**

TRAIL BLAZER (Milliken)

We are proud of Trail Blazer. As the name implies, it is a fiery red-mulberry purple, shot with blue at the tip of the beard which spreads over the central portion of the falls creating a startlingly brilliant color effect. A touch of deep ruby red flanks the cinnamon beard and adds depth and richness to the flower. The standards arch and are closed, while the falls are shaggy and slightly ruffled. A most interesting flower. 3½ to 4 feet. **\$4.50**

TRANQUILITY (Fay)—A.M., A.I.S. '53

As serene and tranquil as the snowy landscape the morning after the storm. An indescribable white with white beard, good form and substance. **\$5.00**

TWILIGHT SKY (Fay)—H.M., A.I.S. '50

A clear pink iris of medium size, smoothly finished and flaring, sharply accented by a deep tangerine beard. 3 ft. **\$1.50**

UTAH SUNSET (Muhlestein)—H.C., A.I.S. '49

A grand iris in proportions and style. The coloring is a biege tan and salmon blend. **\$5.00**

VEILED IN MYSTERY (Milliken)

The entire flower has the appearance of antique satin in an off-white, with an ethereal dusting of the palest chartreuse. Both standards and falls are exquisitely fluted and ruffled. A full violet beard gives this flower a most unusual beauty—different from anything we have ever seen. 3 ft. **\$7.50**

VENETIAN RED (Milliken)

A smooth venetian red self, enriched by a light brown overlay, which gives an antique red of unusual beauty. The flowers are medium sized and nicely ruffled. A lovely cinnamon beard gives the final finishing touch to this attractive flower. 3 ft. See illustration in color on page 11. **\$2.50**

VICTORIAN VEIL (Craig)

Big, ruffled, white ground fancy, completely enveloped in rose-violet lace. The coloring in the standards is a little lighter than in the falls and both are waved and ruffled. Good branching. 44 in. **\$4.00**

VIGIL (Wills)—H.M., A.I.S. '47

A white that blooms, and blooms, and blooms, and then sends up more increase than any other normal iris plant. Really vigorous and the lovely white flowers can't be beat. 36 in. **\$3.00**

WELCOME GUEST (Linse)

We will borrow from Mr. Linse, "A grand amber-gold self. The haft and center are yellow gold, merging smoothly and gradually into amber at the edges. The form is horizontally flaring and the petals are crimped and waved in a most attractive manner. A truly glowing color that improves with age and hot sun." 38 in. **\$10.00**

WHITE PEACOCK (Pattison)—H.M., A.I.S. '52

Probably our favorite blue-white iris. We have seen no other that will touch it for quality and sheer loveliness. Really a delicate blue that turns soft white after a day or so in the sun. Wavy ruffles and cool waxy substance form into a large flower that is wholly lovely and distinctive. If you can't buy it this year, go somewhere where it is growing and become enchanted by it as we are. 36 in. **\$11.50**

CASCADE SPLENDOR

PIERRE MENARD

WHITE RUFFLES (Taylor)—H.M., A.I.S. '47

This iris has been cursed by a reputation for tenderness it has evidently not deserved, as reports have come in from many of the coldest sections this year and told of the great success this iris has been. It is unfortunate that so many have been denied the joy of this sumptuous flower with its gracefully ruffled, broad and flaring petals and statuesque bearing. A magnificent garden specimen. 38 in. **\$2.50**

WINSTON CHURCHILL (Stevens)

A deep crimson red—the standards are a flowing red, while the falls are velvety. A rich gold beard provides an accent note against the rich red of the falls. 2½ ft. **\$2.00**

YUCCA (Babson)

Another recent introduction by Mr. Babson that is sure to win high honors when it is distributed. Pale cream yellow flowers with simply elegant flaring form, excellent branching and vigorous growth. **\$7.50**

ONCOBREDS

We are indeed indebted to Mr. C. C. White, of Redlands, California, whose persistence and untiring efforts have given us this unusually beautiful group of iris. All of them will grow well in California and in mild climates, and many have proven absolutely hardy in cold sections. Give full sun, good drainage, and the less water in summer the better.

JOPPA PARROT (C. G. White)

A strange medley of many colors. The standards are pale violet heavily veined in purple. The falls are honey-beige, heavily streaked with almost every color in the spectrum. The streaks do not melt into a blend, but stand out in a strange manner. The standards are completely closed and the broad falls curve under, forming a complete globe. Luxurious brown beard and deep signal patch. We are sorry, but it apparently is not too hardy. 2 ft. \$5.00

PESHAWAR (Schreiner)

A very richly colored deep red flower. 14 in. Hardy. 75c

PRESENT (C. G. White)

A charming medium sized flower of lilac-violet, lightly penciled, and having a dark red-purple signal patch. Charming in arrangements. 12 to 15 in. 75c

YARKAND (C. G. White)

A strangely beautiful oncobred, carrying much of true onco in its makeup. A medley of violets, with an almost black beard and signal patch. The flower is almost a complete globe, as the falls curl under in true onco fashion. Best of all, it is PERFECTLY HARDY, so even you in cold locations can grow this lovely flower in your gardens. 2 ft. 75c

YOUNG APRIL (C. G. White)

As a cut flower it is indeed a gem. The standards are a bright violet rather distinctly veined and the falls are deeper violet, veined with blackish purple, flushed with brown. An early bloomer. 1 ft. 75c

YUSSUF (C. G. White)

Odd, but interesting, is this large flowered variety of rose purple, heavily splashed with straw yellow. 30 inches. 75c

Miniature Bearded Iris

Here is the bearded iris that is the arranger's delight. Perfect small flowers on wiry stems, directly in proportion to each other and true miniatures of their taller relatives. Also, they have a definite charm in the garden in that spot where you want something small but special, or in the border. The color range is wide and newer varieties are beginning to come on the market in this long neglected and very useful class.

BUNTING (Williamson)

Small pale violet flowers. **50c**

CHEWINK (Williamson)

Pale blue with a bright golden beard. **50c**

DREAM GIRL (D. Hall)

Some may consider this too big for this class, but it seems to fit for us. This was one of David Hall's first pink introductions and is really a petite little flower, tangerine beard and all. If actually it doesn't fit, at least it should be a good breeder in this class to get the pinks into it. 24 in. **\$1.00**

PEWEE (Williamson)

Pure white. **50c**

SANDYSON (Alice White)

In the past few years Mrs. White has been the most active exponent of the Miniature iris section, writing, breeding and heading several "Robins," and in general popularizing this intriguing group of iris. Sandyson is her most recent introduction. It is a little charmer, with purple peppering over a cream buff ground. Perfect form and branching. A true miniature of its tall bearded brothers. 20 in. **\$1.00**

SMARTYPANTS (Alice White)

As the name implies, it is a bold little rascal. Proud of its red veined falls, its sunny yellow standards beam like the smile on the face of a little boy with a fancy new pair of pants. Pert, saucy, and captivating. 16 in. **75c**

SISKIN (Williamson)

Light yellow. **50c**

TITMOUSE (Williamson)

The ground color is amber, spattered with violet. **50c**

TWO FOR TEA (Williamson)

Lovely soft lilac flowers. Also blooms in the fall. **50c**

WARBLER (Williamson)

Bright yellow. The type for this class. **50c**

ZINGARA (Williamson)

A charmer with red blended falls and orange yellow standards. **50c**

Intermediate Bearded Iris

For all general purposes this group of low growing iris can be treated much like the Dwarf group, but technically, they are not true Dwarf varieties.

AUTUMN QUEEN (Snow White). Pure white, blooms spring and fall. **50c**

LADDIE BOY (H. P. Sass). Velvety rich deep blue, late bloomer. **60c**

PALTEC. Not an intermediate, but an intergeneric hybrid between Tectorum (Evansia) and Pallida (Bearded). A rare cross with pleasing blue flowers. It resembles the Tectorum parent. **50c**

SNOW MAIDEN. A pure white of excellent substance. **50c**

LOUISIANA IRIS

"Are there any others with such beauty of foliage, such gypsy grace of curving stem and whimsically turned bud? What other iris tips a flower to the side and looks one full in the face?"—Caroline Dorman.

This delightful group of iris lends itself exceedingly well to flower arrangement. Their graceful stems and clean lines give them a purity of form that can be used to great advantage in modern design.

The colors range from purest white through pastel pinks, orchids, and lavenders, to rose, coral, soft yellows, rust, and copper, blues of every shade, rich dark reds, and even black purples—many strikingly marked with signal patches in shades of yellow to orange.

Best of all, these charmers are easy to grow; they need only good garden care. Given a rich soil with plenty of humus and liberal supplies of water prior to and during the blooming season, these iris will amply reward you with a profusion of exotic blooms.

MILLIKEN GARDENS

Back in 1926 when most of us were calling iris "flag lilies" if we called them anything at all, Mr. Milliken was making his first crosses towards bettering the race.

His record as a hybridizer has been a long and celebrated one, first with such bearded iris of startling departure from older types as China Maid (now a member of the American Iris Society's Hall of Fame), and later with such renowned standards as Tourament Queen, illustrated on this page.

The culmination of his career in iris breeding may yet be to come, but certainly no higher honor could be given him than the Medal for Outstanding Achievement in Iris Breeding from the American Iris Society.

Formal honors by the Hemerocallis Society were given in 1951 in recognition for his daylily work, too, with new awards coming thick and fast for the really remarkable introductions just now reaching test gardens.

Be sure to include some of these Milliken triumphs in your order this year—your garden will be the better for it!

TOURNAMENT QUEEN

Tournament Queen is one of those varieties upon which a reputation is built. Introduced in 1946, this variety performs a double duty, first as a superb winter-blooming iris in mild climates, and second as an early blooming variety in colder regions. But in California and across the South it is at its peak, for it just doesn't seem to know when to stop. First blooms come by Christmas, and it just keeps right on without hesitation clear through the regular iris season. The color, as you can see above, is a most attractive fuchsia, with the falls reflecting the standards in a little greater intensity.

Only \$1.50

SPRINGTIME MADONNA

Another, more recent Milliken iris, this variety has a sort of frost on its petal which is wholly impossible to photograph. Yet it is this crystalline glint that makes difference and that makes close examination of keen pleasure. Blooms freely in November here, the normal season.
